ABSTRACT

Online child manhandle is effect of tyke mishandle by searching out the main cause and recognizing approaches to counteract it. We need to make mindfulness among masses on the issues identified with child mishandle. The framework is designed to correspondence in the middle of the National Investigation and different people groups in the general public to recognize the looking for people groups and tyke works in environment and illuminate to police Non Government Agencies and other peoples NGO'S. It is neighborly communion in the middle of the manhandle protestations.

Keywords: child abuse, society, NGO, police.

I. INTRODUCTION:

Online abuse is any type of abuse that happens on the web, whether through social networks, playing online games or using mobile phones. Children and young people may experience cyberbullying, grooming, sexual abuse, sexual exploitation or emotional abuse. Children can be at risk of online abuse from people they know, as well as from strangers. Online abuse may be part of abuse that is taking place in the real world (for example bullying or grooming). Or it may be that the abuse only happens online (for example persuading children to take part in sexual activity online).

Children can feel like there is no escape from online abuse – abusers can contact them at any time of the day or night, the abuse can come into safe places like their bedrooms, and images and videos can be stored and shared with other people.

The existing framework isn't proficient and compelling as the whole information is kept up crosswise over different documents and frameworks. It is hard to get to the information and play out the essential tasks. The framework can't react legitimately to crisis circumstances.

In this every thing is maintained is maintained in files which is aburden to the police and NGO. The affected children may get fear and there is no communication between users and higher authorities.

The proposed system is a web based application, which maintains a centralized repository of all scheme related information.The main objective of proposed system is to create awareness among the people about child abuse. It can reduce child abuses.

II. MODULES

The modules are as follows

Users:-

All users anonymous users in our system. So any user can give complaint and they view newslettes posted to ngo's and police.

Admin:-

He/she is major rolles in the system to controll the system and users applications from were ever in the society to inform controll the child abuse like kidnaping and unwanted illegal works through the childrens to maintain the clean society is responsible for ever the system to control he/she is approvial to all users in the system.

Police:-
